DETAILED ACTION

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 34-44 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-18 of copending Application No. 09/799,479. Although the conflicting claims are not identical, they are not patentably distinct from each other because they both claim a plurality of removable memory storage devices, a first remote server operable for storing patients identification information indexed patient identification numbers, a second remote server operable for storing patient medical data indexed by the medical records identification numbers, wherein the medical data in the second remote server cannot be correlated to the associated patient identification information maintained in the first remoter server. As such, the instant claims are fully encompassed by the claims of 09/799,479. It would have been obvious to one having an ordinary skill in the art at the time the invention

was made to include a data acquisition device having an input device for receiving qualitative wellness data and quantitative wellness data.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
